Stage: Research		
Research		
Day 1	Evidence, Analysis & Reasoning	
Day 2+	Conducting Research	

Day 1	Evidence, Analysis & Reasoning
Common Core Standards	RI.5-6.1,2,4 W.5-6.1,4,5,7-9 SL.5-6.1,3,4 L.5-6.6
Learning Objectives	Students will be able to:  • Evaluate the strength of evidence based on the credibility of the source and its relevance to a claim
Lesson Resources	Student Journal:  • Pages 28-29  Digital Resources (available on One World website):  • Google Slides presentation
Do Now	Jot-Pair-Share: Where do you get news from? Why do you trust those sources?
Lesson Introduction	<ul> <li>Review class agenda</li> <li>Today students will prepare for more in-depth research by analyzing the strengthens and weaknesses of several pieces of evidence.</li> </ul>
Direct Instruction	<ul> <li>Have students turn to pg. 29 and read "What is Evidence?"</li> <li>Tell students that when they are selecting evidence, they should ask themselves the following questions:         <ul> <li>What is the source? Do you trust it?</li> <li>What type of evidence is it?</li> <li>Does the evidence support the claim (problem or solution) or a counterclaim?</li> <li>Why do you think this evidence is important?</li> </ul> </li> <li>Read the claim and evidence #1 on pg. 28. Model thinking aloud answers to the questions.</li> </ul>
Guided Practice	<ul> <li>Direct students to read evidence #2 on pg. 28.</li> <li>Think-Pair-Share: <ul> <li>What is the source? Do you trust it?</li> <li>What type of evidence is it?</li> <li>Does the evidence support the claim (problem or solution) or a counterclaim?</li> <li>Why do you think this evidence is important?</li> </ul> </li> <li>Students should note the following: <ul> <li>There is no source referenced</li> <li>It contains data (89% of disciplinary problems)</li> </ul> </li> </ul>

	It is negative about recess, so it supports a counterclaim			
Independent Practice	<ul> <li>Students continue the questioning process with evidence #3 and #4.</li> <li>Students answer the Reflection Questions in Step 2.</li> </ul>			
Exit Ticket	Think-Pair-Share: Why is it important to get evidence from trustworthy sources?			
Differentiation Suggestions				
Virtual Learning	Check out the resources and activities available on the News Literacy Project website for additional practice			
Extension	Have students crowdsource a list of reliable websites to use as a class reference			
Student Support Tips	Provide an annotated example of a credible and not credible source for students to reference			

Day 2+	Conducting Research
Common Core Standards	RI.5-6.1,2,4 W.5-6.1,4,5,7-9 SL.5-6.1,3,4 L.5-6.6
Learning Objectives	<ul> <li>Students will be able to:         <ul> <li>Identify relevant evidence that supports a claim and/or counterclaim</li> <li>Analyze evidence for how it supports an element of their argument</li> <li>Monitor the progress of their research and understanding of their topic by answering reflection questions</li> </ul> </li> </ul>
Lesson Resources	Student Journal:  • Pages 30-33  Digital Resources (available on One World website):  • Google Slides presentation
Do Now	Brain Dump: What do you already know about your topic?
Lesson Introduction	Review class agenda
Direct Instruction	<ul> <li>Tell students that they are going to start their independent research today. Set the expectations about research - how many sources are they required to have?</li> <li>Review the Research Log example on page 30:         <ul> <li>Model recording the source information to help 1) easily find the source again and 2) easily reference a source and create a works cited page for their final essay.</li> <li>Record quoted evidence from the source. They can always paraphrase their evidence in their writing later.</li> <li>Identify what part of their argument the evidence supports. They will need to find a balance of evidence that supports not only their claim, but also the counterclaim, rebuttal, and solution.</li> <li>Briefly explain how the evidence connects to the argument they want to make.</li> </ul> </li> </ul>

Guided Practice	<ul> <li>Remind students that they can use the One World website as a starting point for their research.</li> <li>Ask students to share some ideas of websites they know to be credible.</li> <li>Students then find their first source and record the source information. Provide support as necessary.</li> </ul>			
Independent Practice	<ul> <li>Students read their first source and record evidence in the research log.</li> <li>Pull small groups of students that need more support.</li> </ul>			
Exit Ticket	<ul> <li>Choose one research reflection question to answer:</li> <li>What is something surprising that you learned about your topic?</li> <li>What did you learn that changed your perspective on your topic?</li> <li>What was challenging about research today? How will you overcome this challenge?</li> <li>What is your plan for research tomorrow?</li> </ul>			
Differentiation Suggestions				
Virtual Learning	Create a Google Doc or discussion thread where students can share websites and articles.			
Extension	Have students crowdsource a list of reliable websites to use as a class reference.			
Student Support Tips	<ul> <li>Provide an annotated example of a credible and not credible source for students to reference.</li> </ul>
